

Construction Engineering & Inspection

Focused, Expert Services From Planning Through Completion

With years of experience serving state departments of transportation and extensive coordination with the Federal Highway Administration, **Florence & Hutcheson** earned a solid reputation for efficiently and effectively providing construction engineering, inspection, testing and project management services for projects of every size and scope.

Whether you need 'On Call' services to augment your in-house crews or you require the full spectrum of construction engineering and inspection services, F&H inspection teams and Project Managers can mobilize quickly to manage projects according to your exact plans and specification regardless of schedule and timing constraints.

From noise walls, rural new location routes, bridges, dams, reservoirs, interstate roadways to industrial sites, commercial buildings, airports, railways and complete Intelligent Transportation Systems, the depth and range of our experience is reflected in the variety of projects we have completed. Whether for transportation, government, utilities, industry, private developers no project is too large or too small.

F&H services include:

- Pavement Evaluation & Design
- Project Partnering
- Design Review
- Constructability Plan Reviews
- Utility Relocation Coordination
- Cost Estimating & Cost Control Monitoring
- Bidding Assistance & Analysis
- Contractor Submittal & Shop Drawing Review
- CPM Scheduling
- Bridge Inspection, Maintenance & Management
