

Transportation

Comprehensive Planning, Design & Construction Management of America's Transportation Infrastructure

For nearly 50 years, **Florence & Hutcheson** has provided engineering services for transportation project implementation including all aspects of planning, traffic engineering, roadway design, bridge design, and the support services associated with every transportation project. Our experience and capabilities range from minor sidewalk improvements and road resurfacing to the most complex multi-lane interstate design projects in the United States.

We pride ourselves on our ability to perform the majority of transportation engineering services in-house without the use of subconsultants. This turn-key approach results in one point of contact and accountability for our clients and the exceptional client service upon which F&H is founded. The scope of our services and expertise includes:

- Transportation Planning
- Travel Demand Modeling
- Roadway Engineering & Design
- Bridge & Structural Engineering
- Freeway & Arterial Design
- Interchange Evaluation & Design
- Interchange Justification/Modification Reports
- Local Roads & Residential Street Design
- Pedestrian/Bicycle Accommodation Studies & Design
- Roundabout Evaluation & Design
- Route Location Studies
- Safe Routes To School Programs
- Rails to Trails Facilities
- ITS Systems Design
- Complete Traffic Engineering Services
- Surveying
- Geotechnical Services

Let us introduce you to our Transportation experts to learn more about your specific project needs.
